XML Graphics Graphics editors in AutoCAD can be used for creating and modifying graphics, bitmap art and 3D objects. These editors support vector graphics (paths), text, raster graphics (text, polylines, and polygons), photographs, and other image formats. Architecture (A/CA) Architecture design and analysis software from Autodesk (A/CA) can be used for designing and analyzing both interior and exterior architectural spaces, performing 3D walk-throughs, and creating building information models. AutoCAD Architecture has been the most widely used package to design and analyze building interiors (in the U.S.). Design (D/DS) A/DA Design and Drafting from Autodesk (D/DS) consists of several products for architectural and engineering design, including 3D Building Visualizer, which provides architectural and engineering visualization tools, and architectural design and construction management, architectural information management, and AECOM Structural Designer. A/DA Drafting from Autodesk (A/DDS) consists of two primary products, A/DDS Design and Drafting, which is used for 2D drafting and visualizing your designs and architecture, and A/DDS Mechanical, which is used for 3D design, visualization, and engineering. A/DDS Design and Drafting, introduced in 2005, includes a new 3D Viewport feature that allows you to view your drawing from multiple angles. A/DDS Design and Drafting is also available in both Mac and Windows operating systems. Fluid Analysis (F/FA) Fluid Analysis from Autodesk (F/FA) is used for analyzing systems of fluid flow and heat transfer, such as heat exchangers, turbines, and pumps. A/DF Fluids is used for analyzing fluid flow and heat transfer, such as air cooling towers and heat exchangers, gas-liquid separation, and pipe flow. Visualization (V/VI) Visualization from Autodesk (V/VI) consists of products that are used for 3D graphics and animation. These include products from Animation from Autodesk, which are used for creating motion graphics for video, and Visualization from Autodesk, which is used for 3D graphics.
