After several years of development, Autodesk released the first version of AutoCAD for the Apple II series of computers in March 1983. AutoCAD 1.0 was an update to the previous version 1.01 of the software, now called AutoCAD Drafting and BIM 1.0. The Apple II series was a popular desktop machine for computer and drafting use, running at a "Tandy" or "Radio Shack" clone brand, and was very inexpensive. Autodesk continued to develop AutoCAD for Apple II computers, with many of the features that were released in the first version of AutoCAD being included in later versions of the software. The first official release of AutoCAD for the Apple II was in March 1984, with a version called AutoCAD Version 1. The name "AutoCAD" was chosen to be similar to a machine used by the railroad industry, called an Auto-Crate, where a train is loaded and unloaded by automated systems. AutoCAD Version 2.0 was released in August 1984, for the Apple II. Several new features were included in the software, including views and tables, which were tools to organize and store data. These features were not originally part of AutoCAD, and were later implemented by third-party software developers, so that they could work with AutoCAD. Another new feature was the built-in ability to import data from different CAD systems, such as the MicroStation component of the Engineer's Workstation from PTC Inc. Other new features were the introduction of screen windows and the ability to lock multiple windows or drawers. A new feature called the Horizontal Screen Canvas was introduced to support non-90 degree graphic planes. In addition to the new features, the software was now priced at US\$1,150, compared to AutoCAD 1.0's price of US\$495. AutoCAD Version 3.0 was released in May 1985, for the Apple II and Apple II Plus. The new features included the ability to import data from other CAD systems, such as MicroStation, a new feature called "Groups", where a user could lock specific features, such as the ability to lock a section of the drawing, to keep track of changes to the locked sections. Features that were already included in AutoCAD 2.0, but did not work on the Apple II, were added to the new version. Also included was an updated feature called "Drapes".
