## **\*\*What is Structure Drawing?\*\***

**\*\*Structure Drawing\*\*** is a drawing mode that enables you to use a simple, precise way to draw basic geometric shapes and to draw overlapping and nonoverlapping shapes. The shapes appear on the paper in a way that helps you define and see them. The features of this drawing mode are:

- You can see the shapes you create as they are drawn on the paper. •

---

You can resize the shapes to a specific size. • You can define the overlapping relationship between the shapes by using the function of edges and ends. • You can define the exact locations of the endpoints of the shapes. • You can draw shapes on a specific area of the paper.
