(video: 1:08 min.) **Back to Top Surface Creation:** You can easily convert a surface drawing into a flat object. Transform any surface to 2D, copy to a new drawing, or bring it into your current drawing. Or, get your surface's properties and use them to create a new surface in a new location. (video: 1:19 min.) **Back to Top Intelligent Geometry Shapes:** Geometric shapes on the screen have become more intelligent. You can use a standard object or its editable properties to create dynamic, intelligent shapes. You can quickly place a rectilinear object in perspective or recircle it, snap to a joint, set multiple grips, or create a fence. You can also interactively select object types from your AutoCAD database. (video: 1:17 min.) **Back to Top View-Dependent Zooming:** Large AutoCAD files can be difficult to view and navigate. With automatic view display, you can zoom into large drawings to fit the viewport to a specific zoom level. (video: 1:02 min.) **Back to Top 3D Glasses Guide and New Device User Interface:** To easily navigate your drawing, move or zoom the 3D window. When you're finished using the 3D window, use the navigation keys to leave it or change the view back to 2D. The new 3D glasses guide and new device user interface lets you use your device's screen to work in AutoCAD. (video: 2:50 min.) **Back to Top Perspective from within DraftSight:** There are times when you have a perspective drawing and you want to edit it in DraftSight.
