Display multiple views of a complex drawing on the fly. Get an overview of how a drawing will appear to your audience. (video: 2:25 min.) View the new Data Management panel. View, sort, and search data within your drawings to find and correct errors. (video: 2:37 min.) Manage file attachments more efficiently. Add files to drawings from inside AutoCAD or a web browser. (video: 2:56 min.) Develop your architectural drawing skills. Add your own 3D model annotations and export your drawings into a variety of file formats. (video: 3:21 min.) Create precise 3D models of your drawings. Add an elevation, shading, and lighting model to your 3D model of your drawing. (video: 3:22 min.) Create more detailed, textured 3D models with the added features in 3D Drafting Tools. (video: 3:37 min.) Use Measure Window to accurately measure and layout objects on a drawing. (video: 4:10 min.) Make life a little easier in the Field. Access workhorses like Linework, Intersect, and Measure without leaving the application. (video: 4:52 min.) Use Rendered View to show the original image when you need it, and the standard view when you don't. (video: 4:56 min.) More flexibility with placing and configuring splines. Now you can create splines by dragging to a specific control, and change the number of segments using the new tool tips. (video: 5:05 min.) Reorder references when you copy an object. You can assign a reference level to a reference object, so it moves with the rest of the drawing. (video: 5:27 min.) Customize your Draw Order controls. Add a button to the standard Drawing Order controls for the current drawing. (video: 5:48 min.) Build your own drawing with reusable components. Use components to implement common drawing features, such as solids, arcs, and splines. (video: 6:27 min.) Eliminate tedious repetitive tasks and free up your time. Automate drawing tasks so you can focus on your drawing and your work. (video: 6:57 min.) Use the new Interaction Wizard to explore your preferences for the
