What's new in CarX Drift Racing Online - Halloween Sticker Pack:

Post ~ Who's Nikoli? Friday, June 24, 2011 Last weekend, I got the Fantasia Shop Toy Doll as her gag gift. It was the first time that I received such an item, and all I can say is, "Wow... this is cool!" It's a hard doll to describe, because almost all items I got till now are made of poly clay, but this one is made of papier-mâché. It's essentially like a 3-D box with a hole in the middle, so you can move it and pose it. The box is in a state of torture, with gaping cracks in it and so much bent stuff everywhere. Looking at this doll, I'm like, "What the hell!?" I've never seen such a shaped doll before. This is definitely one of the most elaborate dolls that I've seen. It's even a little too much, I must say. The expression of the doll's face is so perfect it scares me a bit! The girl who made this gave me much advice, and I suppose I was really lucky to get something like this. But... I find it rather hard to pose her because she's at a weird angle. The table where I want to keep her is low but tall, and it's not easy to get her to stand straight on. In the end, I found this solution... a pair of scissors! Of course, it's impossible to make her face as perfect as we wanted it to be. So we decided to make some spots for her to look cute. And how do we find those spots? Well, we decided to use the spot that seemed to be the most suitable; this is the eye. The eye is focused on the perspective; if the doll tries to focus her attention on a point with only one direction (sinister, actually), we could say she's uneasy. We could also say that the doll "turns her head around". Haha! I laughed when I heard this. Every time I check the mirror and I see this face, my mind thinks the same thing. So I tried this pose at first. Succinct. Then the next day I tried it on her friend. She has a big, big, big nose. :) The thing that she's terrible at doing is smiling. Her eyes, eyebrows, and lips turn down whenever she smiles; and her mouth is just held shut. For a
