Amazing game! Really interesting battle system and can be a lot of fun if you have the resources to max out all your stats. Some of the characters can really get the job done pretty quickly though which can lead to a lot of dead time. Trying to get the best gear to get the best moves/skills is very rewarding but you also have to level up which can lead to a little grind. When you're grinding you'll need to be careful because there's an annoying travel cost. Combat feels well crafted. Guards and monsters can be quite tough but seem to be balanced between weights so it doesn't feel too easy or too hard. Quality: 5 / 5 Length: 5 / 5 Graphics: 5 / 5 Music: 5 / 5 Suitability: 5 / 5 Functionality: 5 / 5 Options: 5 / 5 The Campaign: At first I didn't know what to expect. For me personally I've never played a fantasy RPG where you're the one actually creating your own character. In most fantasy RPGs, the typical fantasy story is told by the inclusion of mooks. But in Elden Ring, you are creating your own unique character as part of an epic story with your own unique voice. I'll just preface this by saying you CAN grind for a time, but when you're grinding you are pretty much SOL when it comes to anything except enemies, and even then it's usually a hell of a time. Most of the grinding is pretty short, but there are some very long dungeons in the game where you'll be spending a lot of time, so don't be afraid to grind for a while. The story is well told and presents an array of extremely interesting characters. Each character has their own voice and outlook on the story which really makes it feel like you're

controlling your own story instead of being a passive participant in the story of another. While the story itself is a bit overly dramatic and some of the dialogue gets repetitive (the Asmodian is a particular example for me), the story itself is truly engaging. The dialogue is well written and the world building is extremely solid. You can interact with the story in several ways. If you're having problems with something, you can talk to the people around you. If the story is beginning to get too repetitive or if something is going wrong, you can talk to the Wizard. Could Keep You From Starving in Flower Empire**

Those charged with taking care of our iconic Victorian-era noble ladies need a strong constitution to pass on the message of true love. But something pretty much has to happen to keep those delicate flowers off their designer plates of desserts.

The developers behind Flower Empryo have already played an important part in a real-life sister-sister love story. One of the studio's founders, Elaine Coull, just married her fiancée in May, though she shared a more light-hearted tidbit about that experience.

"I've definitely no plans of throwing my wedding dress away. It gets a lot of love from a lot of players," she said. "It's somewhere at the bottom of all my clothes in the cellar. It's sort of become my little piece of love life, but I think it's lovely. I find it quite romantic."

Crack_File.exeQ: PYTHON: how do I execute a long running process using asyncio/aiohttp I'm trying to execute a long running process via python using asyncio and aiohttp. In my first attempt the function will take very long to complete and the use of the eventloop backend will cause the aiohttp client to timing out and die. I'm uncertain if I'm approaching this the right way or if there is a better way to do it. Below I have some code for a simple example of what I am trying to do but it does not work. Any suggestions would be great. My scenario is that I have a small API to retrieve some info but when a long running process is executed it needs to track the status of that process so I need to be able to run the process in the background with a listener so that when the process is done completed I can notify the user in some manner and then be able to move onto the next step of retrieving data. A naive approach using asyncio: import aiohttp import time import asyncio import logging
