I will also reveal that the name of the song is "Better Off" and that's just because I didn't like it much. The chorus (though confusing) stuck out to me,

The present invention relates generally to the field of computers, and more specifically, to the field of image processing. A method and apparatus for correcting random intensity fluctuation of an image are provided. Improving exposure and dynamic range in a still image is a common problem encountered in many capture and post-capture image processing algorithms. While the capture process typically fixes the exposure and spatial distortions, subsequent image processing efforts may be needed to correct the variations in intensity, e.g., between light and dark objects. Algorithms and processes for capturing, storing, and processing images include multiple stages that work together to best capture the images. The processing may attempt to provide a seamless appearance. However, dynamic range is often lost due to oversaturation of the image. When the natural appearance of objects is lost, users of the image may be dissatisfied.
