ScanFix Xpress Activation Code has the unique ability to process images much faster than your computer and provide clean, clearer images. Using other scanning software products can be slow, and taking images and then deskewing and cleaning them and converting them to text can be a time-consuming process. ScanFix Xpress produces cleaner, smaller and faster documents that will score well in OCR (optical character recognition) systems. ScanFix Xpress uses additional processing techniques to improve image quality and speed up processing. Results are included in the process reporting. ScanFix Xpress easily accommodates multiline text and images in documents. When you request processing, ScanFix Xpress starts processing and then communicates results to you. This software is delivered as a .NET software development kit (SDK), a .NET COM control (dll) and an Activity for Windows Workflow Foundation (WF) Each of the components of ScanFix Xpress is provided in a variety of VB.NET, C#, Delphi, and Visual Basic samples, and can also be delivered in a single package. You can also use the documentation provided as a document (WinHelp) that you can run from within your development environment using the Demonstration Content templates.
