a slender maiden in white, hardly a handful more than Aryn's own self. She watched that girl, afraid that a loud voice or an even ruder arm would draw her attention. Risanna stood in a doorway, turning back, back and forth, as if she were waiting for something, but trying to remain unobserved. Aryn could see why. Any young child and old woman huddled in a position between the threshold and the edge of the kitchen was going to make anyone suspicious, and besides, she didn't intend to remain hidden long. When her watch was over, when she was sure that the elders would all be asleep, she would slip in and take the girl. The movement drew Risanna's attention. She looked about, as if her father were about to return and find her missing, even though she knew she was invisible. "Aryn?" she whispered, putting a hand to Aryn's face. "What are you doing here?" "I just came to see if you were all right," Aryn whispered back. "What's happening out there?" "More dreams of the Sovereignty," Risanna said, looking up at the darkness of the cave ceiling. "Our brother Shattenwarr has had another vision. He says that the Lady of Clouds will return soon, and with her, Soar." Aryn felt a chill of dread run across her. "Not one of the others? Lautrec?" "Lautrec? You haven't heard the news yet?" Risanna seemed surprised. "I've not seen him since the day we came here." Aryn pressed her lips together, trying to decide what she should say. She did not want to say anything that would betray the network of loyal Pathfinder Society agents and resourceful locals who had been creating dossiers on the grownups and brief intermittent reports of what the adults were up to. For all she knew, Lautrec was one of those agents. He'd assumed her identity very easily, and he knew nothing of Shattenwarr, and did not talk to her even when it was apparent that she and Risanna were close. For all Aryn knew, it could be any of them. Under normal circumstances, she would

This Edition of Affliction breaks new ground with two unique challenges. One is a strategy challenge unlike any other, while the other is a music challenge unlike any other. The strategy: Affliction is a game that takes place in a post-apocalyptic world. In this world, one day a plague of some kind materialized

and the entire world suffers from the effects of the disease. Time has passed, and it is up to you to start a new civilization and repopulate the world. Your Goal is to advance from one city to the next, and uncover valuable resources. You must also grow a strong civilization in order to achieve total victory. As the years pass, you will encounter different animals and even people that roam the world. If you are prepared with the right strategy, you may even find a few surprises along the way. However, in order to accomplish this, you must carefully consider what you should do on every turn in order to collect resources and populate your cities. The Music: Two contrasting challenges make Affliction the most difficult game for audio-visual production. To begin with, there is not much of an orchestra, so everything is simulated through the developer. The game was originally planned to be a more traditional RPG, and had much of its music intended to be background music. In fact, the music could be turned off entirely, and the game would be virtually identical to the strategy game version that was released. The music for Affliction was actually a very difficult process. The original idea was to make up a soundtrack that would be used for all of the games. Because of the difficulty of making the sound effects and music, the team actually had to be completely reconfigured. They were actually rebuilding the entire game from the ground up, and the new music that Christopher wrote was designed to accompany the new music created by Steven. The original music was actually designed to be the background music, instead of an actually playable melody. The result of this project was two songs that you will hear in Affliction. The first song is a very dramatic and intense theme that signifies the aftermath of a world brought to its knees by a plague. Then there is a slow and rhythmic sound effect that signifies a civilization on the rise. Each song was actually developed individually by Christopher and Steven, and the music in-game is actually a combination of both songs. About the Scenario: The game starts out with a post-apocalyptic world that has been ravaged by a plague. The goal of the game
