The presence of platelet abnormalities can be considered as a prenatal risk factor for thrombotic events occurring during the first year of life in children. The present paper reports two cases of twin pregnancy in which the first pregnancy was affected by severe preeclampsia and the second pregnancy by placental abruption. Thrombocytopenia was detected at prenatal testing in one of the twin pregnancies but not in the other. Both pregnancies were followed by normal deliveries and screening tests for thrombotic events during the first year

LaCie Support FAQs: What is the difference between a drive cleaner and LaCie SAFE Drive? LaCie SAFE Drive is meant to be a file-system "hard" drive. This means that all the data in the hard drive will be encrypted and impossible to decrypt, unless you have the correct decryption keys. When you perform a LaCie SAFE Drive (drive cleaner) you are actually running a normal file-system check and erasing all the data you do not want to encrypt. This doesn't protect your data but you get a much more comfortable experience while running it b7e8fd5c8
