Inspired by Greek mythology, 12 Labours of Hercules has players competing against each other for glory, with goddesses Athena and Hera, and against the genies, giants and monsters they meet along the way. They collect ingredients and build puzzle solving puzzles in their attempt to obtain them all. Our third game, Girl Power: will be released in June 2017 on Steam, and on PlayStation 4 on August 1st, 2017. It is our attempt to create a fair, fun, friendly puzzle game with gorgeous art and polished gameplay. In order to do so, we have to be mindful of the smaller aspects of the game. We have made many changes to 13 Labours of Hercules II in an attempt to ease the learning curve and make the game more accessible. The game is still under development and is only available for Windows, Mac and Linux. All versions are free to play, and you will be able to play the game in the same manner on all platforms. About 12 Labours of Hercules: 12 Labours of Hercules, our first game, is a puzzle game that tells the story of the 12 Labours of Hercules through a puzzle solving adventure. Our second game, 13 Labours of Hercules, takes place between the events of 12 Labours of Hercules. Both games were released on Steam and on PlayStation 4 in early 2016 and have received great feedback from our fans. We are now releasing our third game, Girl Power: the third game in the trilogy will be launching on Steam in June 2017 and on PlayStation 4 in August 2017. We have also released this trailer which shows how the third game will look like. Our second game, 13 Labours of Hercules, inspired the creation of 12 Labours of Hercules and Girl Power. All three games are developed by AurumVox Entertainment Ltd., and are free to play. We have received great feedback from our fans and we hope to continue to improve our games. Read more about the games here. About the developers AurumVox Entertainment Ltd. are the developers of 12 Labours of Hercules. We are a professional development team that have been working on our games for over four years. We are best known for our platformer, Attack of the Brick Blocks, which won 'Best Audio of the Year' at the BT Digital Innovation Awards 2015, and the puzzle game, 13 Labours of Hercules. Finally, run the game using your preferred method, and you're good to go! If you have any questions, feel free to ask! \*NOTE: Play is not final, I have a ton of things I can improve on. Please share any feedback you might have, and join in! Q: How can I not change my search path if my base file does not exist I have a base class with multiple derived classes. My base class uses a file path that is not the base directory, but I can't just put it into the `__init__()` method because I need to do some formatting on the files returned. For example:

```
class Base(object): def __init__(self, fname): self.fname = fname def get_fname(self): return(self.fname) class File1(Base): def __init__(self, fname): Base.__init__(self, f
